### Garri Processing Machinery

- Make Garri(Gari) from Fresh Cassava

Fresh Cassava

Yellow Garri(Gari)

White Garri(Gari)

#### Cassava Garri(Gari) Process Description and Flowchart:

Garri is a fermented and gelatinized dry coarse flour, very popular in West Africa and a staple food in Nigeria, Ghana, Benin and Togo. Its ability to store well and its acceptance as a "convenience food" is responsible for its increasing popularity in the urban areas of West and Central Africa. It is often consumed as the main meal in the form of a dough or a thin porridge. Both are prepared in the household by mixing dry garri with hot or cold water and cooking and are served with soup or stew. Garri is also eaten as a snack when mixed in cold water with sugar, and sometimes milk. It swells three to four times its volume when mixed with cold water.

Goodway delivers the whole range of equipment for garri processing industry from

garri processing machinery to complete garri processing production line.

Multiple distinct operations are required in garri processing: washing, peeling, grating, de-watering, breaking & sifting, garri roasting, milling and packaging.

We provide below a brief description on the main steps of the garri(gari) production process.

### **1 - Cleaning and Washing Cassava Roots:**

Wash the fresh cassava roots in clean water to remove the surface mud and sand. It's the first step of garri(gari) process and very important for the quality of final garri(gari).

### **2 - Peeling Cassava Roots:**

Peel the washed cassava roots to remove the outer brown skin and inner thick cream layer. The water source should be checked regularly to ensure it is not dirty or contaminated.

### **3 - Grating Peeled Cassava Roots into Mash:**

Load the grater with washed roots while the engine is running to grate peeled cassava roots into mash. The grating drum and all food contact areas should be made from stainless steel.

### 4 - Fermenting Mash on the Fermentation Rack:

Collect the cassava slurry into a clean polythene sack and tie, then bagged cassava slurry can be

/ water

### 5 - De-watering Mash into Wet Cake:

Load the bags directly on to a hydraulic press. Lift and press the jack handle up and down until it becomes hard to move. Repeat the process several times each day until no more water comes out of the bag to produce a firm wet cake.

### 6 - Breaking Wet Cake and Sifting Wet Cake into Grits:

Breaking the wet cake into small pieces (grits) and remove the lumps to obtain uniform size grits(wet coarse garri). All food contact areas should be made from stainless steel

### 7 - Roasting Grits into Dried Coarse Garri(Gari):

Roasting the wet grits into dried coarse garri(gari) with low moisture content using an automated garri fryer made of stainless steel material and with electricity, natural gas, firewood or charcoal as the heat source. The final garri(gari) is usually

### 8 - Milling Coarse Garri into Fine Garri(Gari):

Milling the dried coarse garri into fine garri(gari) with the uniform size, then pour the fine garri into a plastic lining inside a woven polythene sack.

Nanyang Goodway Machinery & Equipment Co., Ltd. is a leading manufacturer and supplier of Cassava & Potato Processing Machineries, focus on providing the system solutions in the fields of Cassava Processing Machine, Cassava Starch Processing Machine, Tapioca Starch Processing Machine, Potato Starch Making Machine, Sweet Potato Starch Making Machine, Cassava Flour Machine, Yam Flour Processing Machine, Garri Processing Machinery, Fufu Processing Machine, Cassava Chips Making Machine since 1991 in the worldwide.

If you have any question about garri processing , you are welcome to visit our factory any time.
